TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Golang, SQL

Frontend: React, Next.js, Vue.js, Redux, Redux Toolkit, Zustand, Tailwind CSS, ShadcnUI, Bootstrap

Backend: Node.js, Express.js, Golang Fiber, Loopback 4, WebSockets, gRPC, Microservices, RESTful APIs

Database & Cloud: MongoDB, PostgreSQL, Firebase, Supabase, AWS (S3, EC2)

DevOps & Tools: Git/GitHub, Docker, Kubernetes, CI/CD, GitHub Actions, RabbitMQ, React Testing Library, HuggingFace

EXPERIENCE

bizWorkz Consulting – Consultant Software Developer

Oct 2023 – Present

Pune, India (Remote)

- Led full-stack development of real-time television broadcasting system for an Indian Defence Organisation, College of Defence Management (CDM) using Node.js, React, and WebSockets, enabling Commander-in-Chief to disseminate video content and updates across 4 campuses and 100+ televisions simultaneously, reducing communication delays by 60%
- Engineered Bizhubb CRM platform with Redux state management, MongoDB, and RabbitMQ-powered notifications, reducing manual tracking effort by 40% and accelerating enterprise deal closures by 25% for 50+ enterprise clients
- Built AgencyTool analytics dashboard with React Testing Library and CI/CD pipelines (GitHub Actions) on AWS (EC2/S3), analyzing website metrics to identify performance bottlenecks, improving load times by 35% and user engagement by 20%
- Designed briyte.ai automation tool integrating OpenAI, Gemini, and Deepseek APIs with Golang Fiber and PostgreSQL, delivering ML-driven insights that reduced operational costs by 30% through scalable data processing for 100+ daily users

Sanicon – Full Stack Software Developer

Feb 2023 – June 2023

Pune, India (Remote)

- Spearheaded development of LinkedIn-like social networking platform using ReactJS and Loopback 4 APIs, supporting 500+ beta users with real-time content sharing and professional connections, accelerating feature deployment by 40% in Scrum sprints
- Architected RESTful APIs with Node.js and Express.js, implementing Redis caching strategies that reduced response latency by 50% and improved system scalability to handle 10,000+ concurrent requests
- Designed responsive UI/UX with ReactJS and Tailwind CSS, increasing user engagement through A/B-tested optimizations

Solace – Trainee Software Consultant

Apr 2022 – Sep 2022

Pune, India (Remote)

- Engineered ReactJS dashboard integrating RESTful APIs, AWS S3 image uploads, and Vimeo video library, improving user onboarding completion rate by 45% and extending average session time by 3 minutes through educational content delivery
- Implemented e-commerce cart functionality with Redux Toolkit, reducing cart abandonment by 30% through optimized state management and streamlined checkout flows, processing 1,000+ monthly transactions
- Designed scalable Node.js/Express.js APIs with MongoDB, implementing efficient indexing and query optimization to handle 10x traffic increase without performance degradation
- Integrated Stripe payment gateway and Twilio OTP authentication, achieving 99.9% transaction success rate with zero security incidents
- Built Golang Fiber microservices with gRPC (unary/bidirectional streaming), reducing inter-service communication latency by 40% and supporting 5x traffic scaling in distributed architecture

Sawbon – Full-Stack Developer (Internship)

Feb 2022 – Sep 2022

Bengaluru, India (Remote)

- Developed Node.js APIs for guide-tourist matching platform with Google OAuth 2.0, SendGrid email automation, and geospatial filtering (10km radius search), improving booking efficiency by 50%
- Built comprehensive frontend features including search, cart, and dual dashboards using ReactJS, Redux Toolkit, and Bootstrap 5, implementing efficient filtering algorithms that increased active users by 40%

Primary Key Technologies – Frontend Developer

Dec 2021 – Apr 2022

Mumbai, India (Remote)

- Built production Vue 3 gambling application with Vuex state management handling 2,000+ concurrent users, delivering MVP 2 weeks ahead of schedule through close collaboration with backend teams and product stakeholders
- Integrated two-factor OTP authentication flow, reducing unauthorized access incidents by 90% through robust encryption protocols

Gitanjali.org – Frontend Developer (Internship)

Mar 2021 – Aug 2021

Bengaluru, India (Remote)

- Developed exam module system using React 17 with fully responsive components and JWT authentication, supporting seamless online assessments for 2,000+ students during critical examination periods
- Optimized component performance and bundle size using Chrome DevTools and React Profiler, achieving 40% faster page loads and supporting 3x concurrent user capacity

PROJECTS

52 Projects in Public Challenge | github.com/Akash-ship-it | Ongoing

- Building 52 real-world applications publicly (AI tools, SaaS apps, developer utilities) using React, Next.js, TypeScript, OpenAI APIs, HuggingFace, Supabase
- Current: AI Autonomous Workflow Agent (Project #4) – Multi-agent system for task automation, documenting entire development process for community learning and open-source contribution

Technical Content Creator | youtube.com/@akashmore83386 | 30+ Subscribers

- Publishing DSA problem solutions, system design concepts, and full-stack project walkthroughs focused on practical coding tutorials and algorithm explanations for aspiring software engineers

EDUCATION

Bachelor of Computer Applications (BCA), Manipal University

Oct 2021 – Dec 2024

Jaipur, India (Distance Learning)

CERTIFICATIONS

AlgoExpert Certified (Data Structures & Algorithms) | **Modern React with Redux** (Udemy) | **Microservices with Node.js and React.js** (Udemy)
